COMPANY OVERVIEW

One company. Multiple ways to support your operation.

Supply, procurement, technical services and contracting under one coordinated operating model.

Precision Matrix Services LLC is a U.S.-based supply, services and contracting company serving public-sector, commercial, industrial and institutional customers. We source equipment, materials, MRO and facility supplies, coordinate procurement and logistics, and support technical and project-based requirements.

Our focus is practical execution: understand the requirement, identify compliant sources, manage documentation and delivery, coordinate qualified technical resources when needed, and support the customer through completion.

NC VENDOR REGISTRATION

Registered in NC eVP

SPECIALIZED MARKETS

Pharmaceutical, Biotech, Oil & Gas, Energy

Common products for public-sector operations

Supporting state agencies, counties, municipalities, schools, colleges, universities and institutional buyers.

Office & Furniture

Office products, desks, seating, shelving, storage and general administrative supplies.

Janitorial & Sanitation

Cleaning chemicals, liners, paper products, dispensers and sanitation equipment.

Safety & PPE

Gloves, eyewear, hard hats, protective clothing, safety equipment and signage.

HVAC / Mechanical / Plumbing

Filters, motors, pumps, valves, fittings, piping accessories and mechanical components.

Electrical & Lighting

Lighting, wiring, breakers, outlets, controls, cables, enclosures and related accessories.

Tools & MRO

Hand and power tools, fasteners, bearings, seals, batteries, shop supplies and maintenance consumables.

Uniforms & Workwear

Work apparel, uniforms, outerwear and customization through qualified suppliers.

Packaging / Mail / Storage

Boxes, envelopes, shipping materials, storage products and general-use commodities.

Flexible sourcing for facilities, operations and recurring needs

Product categories can be sourced individually or combined into recurring supply and facility-support programs.

Laboratory & Facility

Eligible laboratory consumables, facility products and general equipment.

Food-Service & Hospitality

Equipment, disposables, packaging and institutional supplies.

Automotive & Fleet

Shop supplies, batteries, accessories, maintenance products and fleet-related equipment.

IT & General Equipment

Computers, accessories, AV, peripherals and general equipment where permitted.

Facility Maintenance Materials

Filters, belts, lubricants, hardware, repair parts, replacement components and consumables.

Emergency & Operational Readiness

General emergency-response, cleanup and continuity-of-operations supplies.

Typical purchasing models

- One-time purchase orders
- Recurring and blanket orders
- Annual and multi-year term supply
- Project material packages
- Supplier/subcontractor support to prime contractors

Technical capability beyond product supply

Support can be provided directly where qualified and permitted, or through appropriately qualified/licensed resources when required.

Technical & Facility Support

Facility systems support, troubleshooting and technical project execution.

Preventive & Corrective Maintenance

Planned and corrective maintenance support subject to site and licensing requirements.

Instrumentation & Controls

Instrumentation, calibration coordination, BMS/EMS and controls-related support.

HVAC & Utility Systems

Equipment sourcing and support for HVAC, mechanical and utility systems.

Commissioning & Qualification

Project documentation and regulated-facility commissioning/qualification support.

Procurement & Strategic Sourcing

Supplier identification, quotation management, sourcing and fulfillment coordination.

Supply-and-Install

Equipment/material supply with qualified installation resources where required.

Project & Contractor Coordination

Supplier, subcontractor, schedule, delivery and documentation coordination.

Support for regulated manufacturing environments

Facility-system awareness, documentation discipline and sourcing support for GMP-oriented operations.

CORE SUPPORT AREAS

CRITICAL UTILITIES

HVAC, clean steam, compressed air, process gases, chilled water and water systems.

MAINTENANCE & RELIABILITY

Preventive/corrective maintenance coordination, troubleshooting and reliability support.

INSTRUMENTATION & CONTROLS

Instrumentation, calibration coordination, BMS/EMS and controls-related support.

COMMISSIONING & QUALIFICATION

Commissioning, qualification, turnover and documentation support.

MRO & FACILITY SUPPLY

Filters, valves, fittings, PPE, tools, instrumentation accessories and consumables.

How Precision Matrix can support a regulated facility

- Supplier for facility, MRO and technical components
- Technical-services resource for utilities, HVAC, instrumentation and controls
- Project-support partner for commissioning, qualification, documentation and turnover
- Subcontract resource for larger engineering, maintenance or construction teams
- Procurement and sourcing support for planned work and urgent operating requirements

Industrial supply and technical project support

Equipment, components, MRO materials and sourcing coordination for maintenance, operations and project requirements.

VALVES, FITTINGS & PIPING

Valves, fittings, flanges, nozzles, piping accessories and related mechanical items.

SEALS, FASTENERS & COMPONENTS

Seals, O-rings, bolts, nuts, gaskets and maintenance components.

INSTRUMENTATION

Instrumentation accessories, controls-related components and measurement-support items.

MRO & SAFETY

Tools, PPE, maintenance consumables, facility and operational supplies.

EQUIPMENT & MATERIAL SOURCING

Manufacturer/distributor sourcing for specified industrial requirements.

Execution model

Precision Matrix is structured to support both routine operating requirements and project-driven sourcing while maintaining clear specification, documentation, logistics and delivery control.

- Specification review and supplier qualification
- Manufacturer/distributor quotation management
- Documentation, freight and lead-time coordination
- Project material tracking and delivery support
- Technical coordination for maintenance and project requirements

Keeping facilities supplied and operational

Products, maintenance materials and technical coordination for production environments, utilities and facility operators.

MECHANICAL SYSTEMS

Pumps, valves, fittings, filters, belts and mechanical maintenance components.

ELECTRICAL & CONTROLS

Electrical hardware, drives, controls, instrumentation accessories and enclosures.

FACILITY & MRO

Tools, shop supplies, safety products, janitorial items and general materials.

HVAC & UTILITIES

HVAC equipment/parts, utility-system components and maintenance support.

PROJECT MATERIALS

Equipment packages, replacement components and coordinated project supply.

Where we add value

- Bridge procurement requirements with facility and maintenance needs
- Coordinate technical product sourcing across multiple categories
- Support shutdowns, maintenance campaigns and replacement projects
- Help manage supplier interfaces, deliveries and project documentation
- Provide flexible supply, service and subcontract support based on scope

From solicitation review to contract performance

Structured to support product bids, recurring supply, service agreements and prime/subcontract opportunities.

ONE-TIME PURCHASES

Responsive sourcing and delivery against individual purchase orders.

IFBS / RFQS / RFPS

Specification review, supplier quotations, bid support and compliant fulfillment.

TERM CONTRACTS

Recurring or as-needed supply under annual or multi-year agreements.

SUPPLY + SERVICE

Equipment/material supply with technical support or installation where permitted.

PRIME / SUBCONTRACT SUPPORT

Product or service support to larger prime contractors.

Contract delivery process

- 1 Understand specifications, quantities, schedule and terms
- 2 Source and qualify manufacturers, distributors and service partners
- 3 Validate compliance, lead time, freight, warranty and documentation
- 4 Coordinate purchasing, logistics and technical execution
- 5 Confirm delivery/completion and support warranty or follow-on needs

A disciplined sourcing and execution approach

Clear requirements, compliant sourcing, coordinated delivery and documented closeout.

Reliable sourcing. Technical awareness. Responsive execution.

A dependable partner across supply, services, contracting and procurement.

Broad Sourcing

Multiple supply categories across public and private operations.

Technical Understanding

Engineering and facility-system awareness to interpret technical requirements.

Flexible Contracting

Product supply, term supply, service agreements, supply-and-install and subcontracting.

Responsive Communication

Clear quotation, order, delivery and project-status communication.

Supplier Network

Manufacturers, distributors and specialized resources engaged according to the requirement.

Customer Focus

Attention to compliance, quality, delivery and long-term working relationships.

Our operating principle

We aim to make procurement and project support easier for customers by combining responsive sourcing with practical technical understanding and disciplined coordination.

LET'S SUPPORT YOUR NEXT REQUIREMENT.

Products. Services. Contracting. Procurement. Technical and project support.
